

Production Operators

We are Ashwoods Electric Motors – an innovative, fast growing, technology firm based outside Exeter. We design and manufacture electric motors that are smaller, lighter and more efficient than existing models.

We are now receiving significant orders to build these ground-breaking motors in volume, which we will be manufacturing in our purpose built new Devon facility at Harcombe Cross, Chudleigh with the support of a £1.2M grant from the UK Government.

As a result of this increase in production volume we are now looking for additional team members to join our production team. Initially this will be on our current manual production line then transferring to our new automated robotic line once it is commissioned.

Roles & Responsibilities:

- Manual assembly of high-spec electric motors
- Testing of motors and sub-assemblies
- Operation of automated assembly equipment
- Generation & maintenance of production and test records
- Ensuring consistent quality of output
- Maintenance of production equipment

Desired skills and characteristics:

- Practical experience in an automotive, engineering, or similar sector would be useful
- Experience of working on manual and automated production lines
- Experience of manual and automated testing
- Experience of working to written procedures
- Manual dexterity
- Great attention to detail
- Strong work ethic
- Good timekeeping
- A good understanding of Health & Safety in the workplace
- Knowledge of Lean Manufacturing principals would be useful
- IT literate
- A team player with a good sense of humour

Salary & Benefits:

- Competitive salary
- Bonus scheme
- Great work life balance
- 24 days annual holiday (increasing to 28 days after 4 years continuous service)
- Childcare vouchers

Although experience of working in an automotive or similar environment might be useful you don't need to be an expert at electric motors as we'll show you how they fit together. However, you do need to be enthusiastic, committed and willing to learn – if this sounds familiar then we'd love to hear from you!

How to apply:

If you think this job is for you, then why not email us, briefly summarising why you'd be great for the role and including a copy of your CV to work@ashwoods.org.

Incidentally, if you're looking at us on behalf of a recruitment agency then thank you for your interest but we're already working with some wonderful people in the industry on an exclusive basis. Thank you
